

E Mitigation & compensation (continued)

E3 Habitat creation, restoration and/or enhancement

Quantitative summary of habitat creation, restoration or enhancement measures

The left side of table below summarises the impacts you specified in section D. Enter the habitat creation, restoration and/or enhancement that will be undertaken to compensate for these impacts in the right hand column.

Habitat	Impacts		Compensation	
	Effect	Number or area (ha) lost	Habitat creation, restoration or enhancement measure	Number or area (ha) gained
Breeding ponds	No. Waterbodies lost	10	No. Waterbodies to be created	26
	No. Waterbodies damaged	2	No. Waterbodies to be restored or enhanced	2
	Area of Waterbodies to be lost	0.484	Total area of Waterbodies to be created	0.555
Core terrestrial habitat	Core terrestrial habitat lost or damaged	6.37	Total area of Waterbodies to be restored or enhanced	0.133
			Area of habitat within 50m of breeding Waterbody to be created, enhanced or reinstated	2.88
Intermediate terrestrial habitat	Intermediate terrestrial habitat lost or damaged	73.84	Area of habitat 50-250m of breeding Waterbody to be created, enhanced or reinstated	34.28
Distant terrestrial habitat	Distant terrestrial habitat lost or damaged	0	Area of habitat >250m of breeding Waterbody to be created, enhanced or reinstated	0

If appropriate, comment on the above figures for habitat creation, restoration or enhancement (eg: "The small net loss of terrestrial habitat will be addressed by enhanced quality in created and retained areas. This will be done by...")

NB: All habitat creation, restoration and enhancement measures must be shown on FIG. E3.1 - see "Map checklist" tab
 The figure provided above is for the total habitat loss and habitat creation along the route of the A6 MARR. Refer to annex 1 for a break down for each meta-population.

E3.1a Describe the location(s) of aquatic habitat creation, restoration or enhancement measures. (Confirm landowner agreement for these measures, if they are to be created on land outside of the applicant's land ownership, in Declaration worksheet J).
 Refer to annex 1.

E3.1b Describe the creation, restoration or enhancement of aquatic habitats (include design and water body dimensions as per mitigation guidelines: these will be included in any annexed licence issued). **NB: Only put timing of aquatic creation, restoration or enhancement in the timetable E6a.**

Refer to annex 1.
