

# COMMUNITY SPACE IMPROVEMENT PROJECT

A6MARR

MORGAN SINDALL

A Carillion and Morgan Sindall Joint Venture

Are you planning a project that will improve a community space in your area? Would you like us to provide your materials and support to see your project dreams fulfilled? Carillion Morgan Sindall would like to help realise your ambitions. As part of the A6 to Manchester Airport Relief Road (A6MARR) project we are launching the second wave of Community Space Improvement Projects to help communities and groups develop and improve their community spaces.

## WHO CAN APPLY?

If you are a community group or you are improving a space for community use, you can apply. Your project should be within 0.5km of the A6MARR or should have a significant benefit for communities within that area.

## WHAT CAN YOU APPLY FOR?

You can apply via the online application for a range of hard landscaping materials to support construction of your planned project. There is also the chance to receive additional support and training as part of the project. You may have a wall that needs rebuilding, a path that needs resurfacing or you may want to build some raised beds to make gardening easier and more accessible.

## AIMS OF THE IMPROVEMENT PROJECT

- To facilitate the delivery of local community space projects
- To allow communities to benefit from construction materials
- To provide volunteering opportunities in the local community

The finished pathway and BBQ area for Friends of Stanley Hall Park, Handforth
